Dear Mike,

I do not completely understand why you want Dr. Hermanson to have a file of our letters so far. Would it not be neater to just send him a letter describing what we have been doing as well as the plans of action (catalogues, files, books, etc.)? It seems to me that this method might be clearer and more direct than asking him to wade through the complete file and would convey the same information. Anyway the decision is yours and here is the copies of our latest letters and the file for Dr. Hermanson.

love,

Dick
