

23/4 April 19

Dave,

Here's some odds and ends of the letter exchange, plus some other odds and ends:

such as some constructive and/or (?) constructional ideas from Patrick Grim, philosopher of Boston, whom I engaged (with some liberty, perhaps) on behalf of "our corporation" as an "architectural consultant," and your comments to him should be directed to the address (this page, over) and I have some upstairs, so to speak, which if they arrive on paper, I'll be sure to send you some copy (i.e. re idea #1, Einstein wrote "The properties of space are not independent of the matter which occupies it.").

With love to your friends
and your house
Mike
